Figure 13.7.9 – Excess Margins

Calculating Excess Margins

Using the same illustration above the Company A shares, when the valuation price rose to \$10.20, the margin holding for the customer is \$1,640. Excess margin is the amount in excess of Initial Margins + Additional Margins = \$ 616 (\$1,640 - \$1,024).

Investor Invests in Company A		Maintenance Margin MM = 10%	Additional Margin AM	Required Margin = MM + AM	Initial Margin IM = 1.2 X MM	IM + AM	Margin Holding	Margin Call
Day 1	Buys 1 lot of Company A's ES at \$10	(\$10 x 1,000) x 10% = \$1,000	-	-	\$1,000 x $\frac{1.2}{1}$ = \$1,200	-	\$0	\$1,200
Day 2	Valuation price = \$9.50	(\$9.50 x 1,000) x 10% = \$950	(\$10 - \$9.50) x 1,000 = \$500	\$950 + \$500 = \$1,450	\$9.50 x 1.2 = \$1,140 \$1,140	\$1,140 + \$500 = \$1,640	\$1,200	\$440
Day 3	Valuation price = \$10.20	(\$10.20 x 1,000) x 10% = \$1,020	(\$10 - \$10.20) x 1,000 = - \$200	\$1,020 + (-\$200) = \$820	\$1,020 x 1.2 = \$1,224	\$1,224 + (- 200) = \$1,024	\$1,640	\$0
